

Chains

All RK Heavy Duty & Sealed-ring Motocross chains utilize special heat treated hi-carbon steel components with solid rollers and bushings, then pre-stressed and pre-stretched for maximum performance and wear life.

RK

Racing Chain

420MS & 428H

Heavy duty chains up to 125cc Applications:

These lightweight mini-works racing chains were developed from the same advanced alloy material and manufacturing technology as MXZ chains.

Both 420 and 428MXZ Racing Chains are the strongest in their class giving you the best Value-Performance rating of any MX Racing Chain in the world today!

Available in Gold or Metal finishes.

RK O-RING CHAINS

RK offers the best O-ring chains in the industry. All RK O-ring chains are constructed of hi-carbon alloy steel for strength and durability.

RK utilizes Nitrite Butadiene O-rings to seal in lubrication and deliver smooth power with no O-ring drag or loss of horsepower.

420MXZ & 428MXZ

Heavy duty chains up to 125cc Applications:
These lightweight mini-works racing chains were developed from the same advanced alloy material and manufacturing technology as 520MXZ.

Both 420 and 428MXZ Racing Chains are the strongest in their class giving you the best Value-Performance rating of any MX Racing Chain in the world today!

Available in Gold or Metal finishes.

RK O-RING CHAINS

RK offers the best O-ring chains in the industry. All RK O-ring chains are constructed of hi-carbon alloy steel for strength and durability.

RK utilizes Nitrite Butadiene O-rings to seal in lubrication and deliver smooth power with no O-ring drag or loss of horsepower.

RECOMMENDED 520 CHAINS

	1st	2nd	3rd
SUPERCROSS RACING	MXU	MXZ4	
MOTOCROSS RACING	MXU	MXZ4	EXW*
ENDURO RACING	MXU	EXW*	
OFF-ROAD	EXW*	MXU	
DUAL SPORT	EXW*		
ATV	EXW		

* Cannot be used on CRF250F/X due to case clearance.

Chains

GB520MXU is the lightest sealed-ring motocross chain available on the market today. Made for the professional motocross racer, GB520MXU is the next generation of motocross racing chains featuring RK's new UW-sealing rings.

MXU chains are designed to provide the most consistent power delivery and increased chain life. All components are heat treated using RK's exclusive HIT (Heat Induction Transfer) process.

MXU has a maximum tensile strength rated at 9,000 foot pounds, weighs a mere 3.0 lbs for 100 links and can handle any MX race application from 125 to 500ccs.

GB520EXW is specifically designed for ATV/Quads and Off-Road vehicles and is the best high-speed, extreme heat, off-road performance chain available today.

EXW chains were developed to survive the abrasive conditions that exist in hostile off-road environments.

EXW features XW-ring seals composed of Nitrile Butadiene with three contact lips and two convex inner/outer stabilizers.

This means three lubrication pools to protect against high-speed abrasion, and the loss of lubricant under these extreme conditions.

GB520MXZ4 is The Lightest Motocross Chain available on the market today.

Made for the professional motocross racer, GB520MXZ4 is the next generation of motocross racing chains featuring RK's new deeper gold side plates.

MXZ4 chains feature chromoly steel construction with seamless rollers and bushings, and oversized special alloy pins for added strength.

All components are heat treated using RK's exclusive HIT (Heat Induction Transfer) process, MXZ3 has a maximum tensile strength rated at 39.1 kN, weighs a mere 1.36Kg for 100 links, and can handle any MX race application from 125~500cc.
